Sound Quality

Extract from test overview
 Compact Loudspeakers
 STEREO 9/99 (translation)

Extract from Audio, Germany

"The system offers both very good tonality and even better dynamic characteristics in the bass department that are well in excess of expectations for a system of this size and backed this up with amazing level accuracy. (...) because high output levels do not worry the COUPLET one little bit." "As regards its ability to project sound accurately, the VISATON model took over the top of the table for this price range." "the appearance of this model, with its bevelled edges and technology appeal is a real eye-catcher."

Extract from STEREO, Germany

"Considering its size, the VISATON COUPLET has excellent, very deep but clearly defined bass, and can easily be placed on shelves due to its neutral tuning." ... "It was in particular in the vocals and sound source positioning that this little VISATON model picked up its points. (...) which is the most important characteristic of the COUPLET to guarantee years of listening pleasure."
